

# Preface

The 11th South African Symposium on Numerical Mathematics was held at Umhlanga near Durban on July 8–10, 1985, under the auspices of the South African Society for Numerical Mathematics and the University of Natal. It was attended by 48 delegates from five countries, who attended 6 invited and 30 contributed talks. This issue contains the text of 9 of these talks, all of which have been refereed by one or more referees. Of the 19 referees who assisted, 9 are South African and 10 from various other countries.

The participation of invited speakers from abroad was made possible thanks to a generous donation from IBM South Africa.
